NIA Chargesheets Another Key Accused in 2022 Chittorgarh Explosives Case

New Delhi, 22nd July, 2025

The National Investigation Agency (NIA) on Monday chargesheeted Firoz Khan, a key accused who was arrested in April this year after absconding for three years in a Chittorgarh recovery of explosives case.

The accused has been charged under various sections of IPC, Explosive Substance Act, and UA(P) Act, combined in the main chargesheet and the present supplementary chargesheet filed before the NIA Special Court, Jaipur. The court had earlier declared Firoz a proclaimed offender and had also issued a standing warrant of arrest against him.

NIA investigations have shown that Firoz Khan had conspired with several co-accused in the case, related to the recovery of explosives and components used in fabrication of Improvised Explosive Device (IED) in March 2022. He had attended conspiracy meetings and, on the direction of co-accused Imran Khan, had purchased chemical substances for fabrication of IED.

NIA had earlier, in September 2022, chargesheeted 11 accused persons in the case RC-18/2022/NIA/DLI, registered in April 2022. A supplementary chargesheet was also filed in November 2023.
